Kian Naquines

Open to Work

AI-First Full-Stack Engineer | North Cotabato, PH | Asia/Manila

I design, build, and ship reliable web and mobile systems with an AI-first mindset. Recent work includes real-time data pipelines, ML-powered product features, and tooling that speeds up delivery.

I love building things

Crowd Monitoring with AI

Visit

Capstone project: IoT-based crowd detection using WiFi probe requests with real-time AI dashboard and WebSocket visualization.

Python | FastAPI | React | MQTT | Docker | ML

Web Application Firewall

Visit

ML-powered WAF that detects and blocks malicious web traffic using trained classification models.

Python | Scikit-learn | Pandas | Django

Heart Disease Prediction

Visit

Machine learning model achieving 98% accuracy for predicting heart disease risk from patient health data.

Python | Scikit-learn | Pandas | Matplotlib

NLP Transformer App

Visit

Web app leveraging transformer-based NLP models for complex language tasks using the GROQ API.

Python | GROQ API | FastAPI | React

Radio Station Log Manager

Visit

Log management software for radio stations with scheduling and automated report generation.

Laravel | PHP | MySQL | Bootstrap

Student Management System

Visit

Built for Pamantasan ng Lungsod ng Pasig - enrollment, grading, attendance tracking, and automated report generation.

PHP | MySQL | JavaScript | Bootstrap

My Technologies

React | Next.js | TypeScript | JavaScript | Tailwind CSS | Node.js
Python | Go | PHP | Django | Flask | FastAPI | Laravel
PostgreSQL | MySQL | MongoDB | SQLAlchemy | Flutter
Bootstrap | jQuery | scikit-learn | TensorFlow | Pandas | Docker
MQTT

Experience

HighSpring

Software Engineer - Flask, FastAPI, MySQL

Built backend systems and APIs focused on reliable web application flows, database-backed features, and maintainable service architecture.

`Flask` `FastAPI` `MySQL`

University of Southern Mindanao

Full Stack Developer - Laravel, Vue.js, PrimeVue, Inertia.js, SQL Server

Delivered full-stack product features across backend and frontend layers, with a focus on admin workflows, data-heavy interfaces, and smooth user experience.

`Laravel` `Vue.js` `PrimeVue` `Inertia.js` `SQL Server`

Upwork

Freelance Software Developer - Anything

Worked on a wide range of client needs, adapting to different tools, product requirements, and delivery timelines to ship practical software solutions.

`React` `Python` `PHP` `FastAPI` `Laravel`

My journey as a developer

NOW

AI-First Full-Stack Engineer

Building microservices, CI/CD pipelines with Docker & GitHub Actions, ML-powered features, and real-time data pipelines. Developed portfolio with NextJS, Shadcn/UI, AceternityUI.

Docker Python Go NextJS React AceternityUI

2024

IoT Crowd Monitoring System

Developed privacy-conscious crowd detection using WiFi probe requests. Real-time dashboards with WebSockets. Enrolled in Agile Project Management & Google AI Essentials.

MQTT Docker ML FastAPI Go React

2023

Data Science & ML Breakthrough

Built Heart Disease Prediction Model with 98% accuracy. Delivered Dormitory, Irrigation, Agriculture Buy & Sell, and Hospital Management systems.

Python Django Scikit-learn Pandas

2022

Freelance Growth

Delivered an Inventory Management System for a retail chain and an E-commerce Platform with payment integration.

PHP MySQL JavaScript Bootstrap

2021

Algorithms & Data Structures

Mastered BST, Stack, Queue, Bubble/Quick/Merge Sort, and Recursion. Solved 30+ Codewars problems in Python and Java.

Python Java DSA

2020

First Professional Project

Developed Student Management System for Pamantasan ng Lungsod ng Pasig - enrollment, grading & attendance tracking with automated reports.

PHP MySQL JavaScript Bootstrap

2018

Programming Journey Begins

Learned HTML/CSS fundamentals, built first static websites, and discovered PHP for dynamic content.

PHP HTML CSS JavaScript

Get in touch

I'm currently open to new opportunities. Whether you have a question or want to say hi, hit that button.
